

ORACLE®

Accelerate Migration to Cloud Infrastructure with Oracle Data Integration Platform

SUN6896

October 1–5, 2017
SAN FRANCISCO, CA

Thomas Vengal
Director of Product Management, Oracle Data Integration
@thomasvengal

Kalyan Villuri
Senior Manager, Data Services,
Veritas Technologies LLC

October 01, 2017

ORACLE

Safe Harbor Statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described for Oracle's products remains at the sole discretion of Oracle.

Program Agenda

- 1 Cloud Journey -Challenges
- 2 Introducing Data Integration Platform Cloud
- 3 Customer Spotlight– Veritas Cloud Journey
- 4 Question & Answers

A man in a dark suit, light blue shirt, and dark tie is looking at a tablet. The background is a blurred city night scene with bokeh lights. The overall color scheme is teal and blue.

Cloud Journey

Challenges & Requirements

ORACLE

Cloud Predictions 2017

One

Cloud-based mission-critical workloads will take off.

Eight

The cloud migration will be most successful for smaller businesses.

Two

Corporate-owned data center hardware will plummet.

Five

The use of managed applications will increase.

Nine

60 percent of IT organizations move systems management to the cloud.

Three

Enterprise Cloud becomes the most secure place for IT processing.

Six

Wearing an AR headset will be a thing.

Four

Digital transformation becomes the norm.

Seven

Developers will move to low-code.

Ten

50 percent of DevTest will move to the cloud.

Oracle Cloud Platform for Integration

Application and Data Integration

Complete

Simplified

Open

Enterprise Grade and Broad Data Integration Capabilities

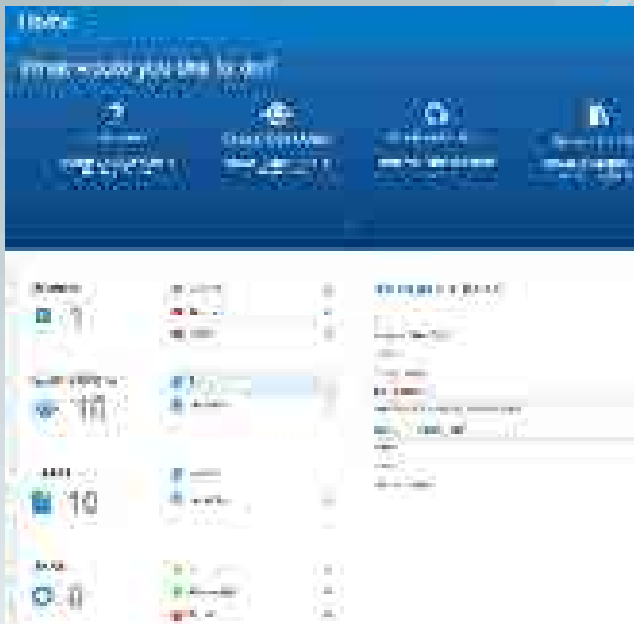

ORACLE DATA
INTEGRATION
PLATFORM

NEW: Oracle Data Integration Platform

Integrate Cloud and On-Premises Data Lakes and Data Warehouses

...a **Unified** solution

...that's **Easy** to use

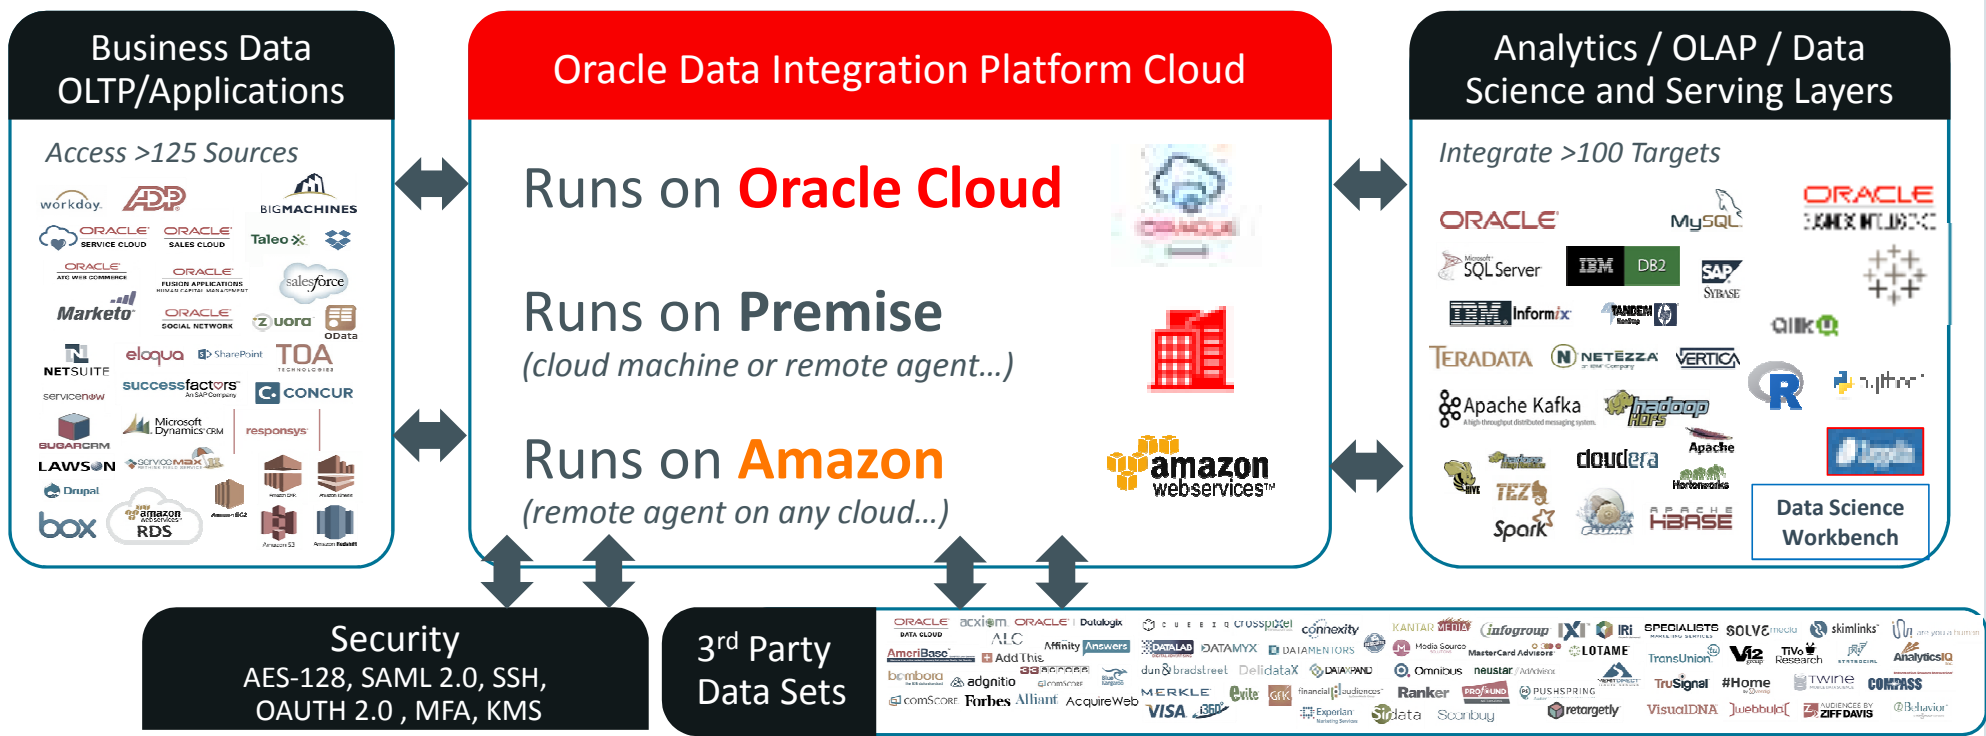

...for **Powerful** data-driven solutions

Key Capabilities

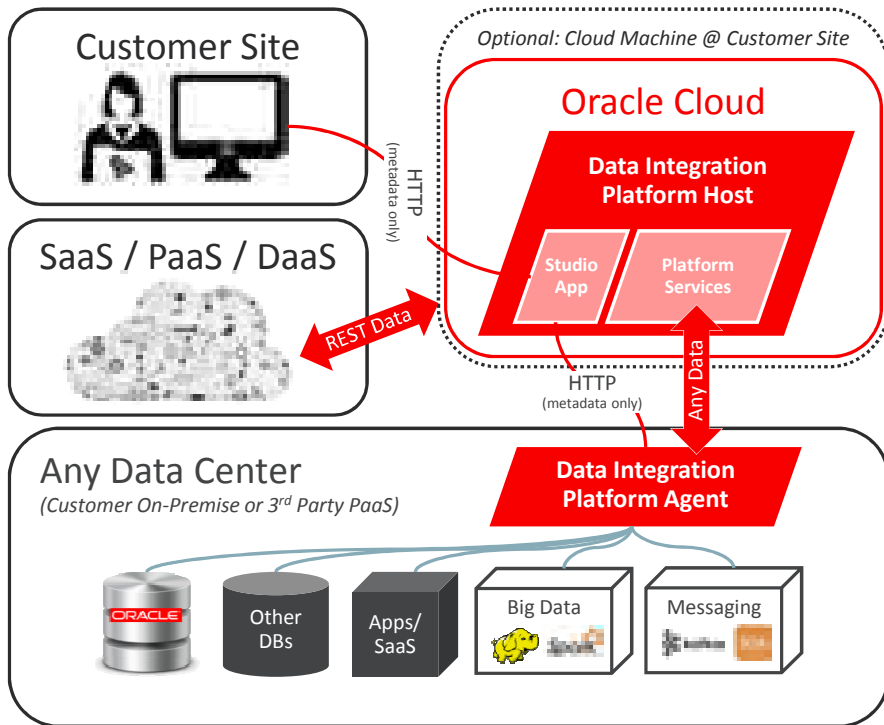

1. Data High Availability
2. Data Migrations
3. Data Warehouse Automation
4. Databus & Stream Integration
5. Data Governance

ORACLE

Open & Secure Platform

Hybrid & Modular Footprint

Example #1: On-Premises Integration

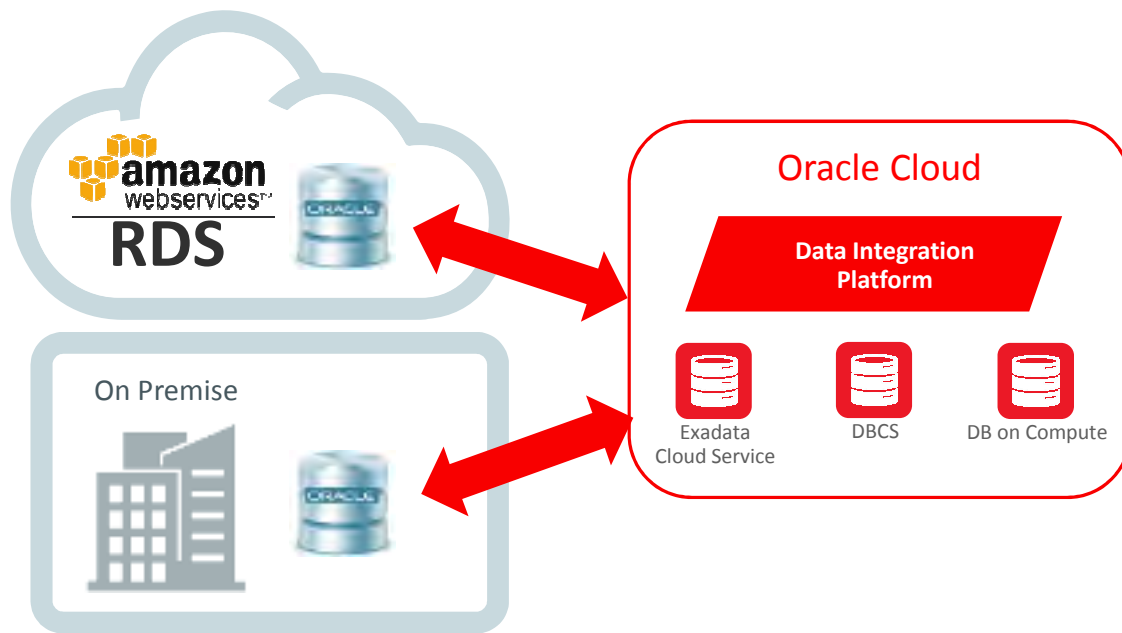

Example #2: Oracle Cloud Integration

Example #3: Third-party Cloud Integration

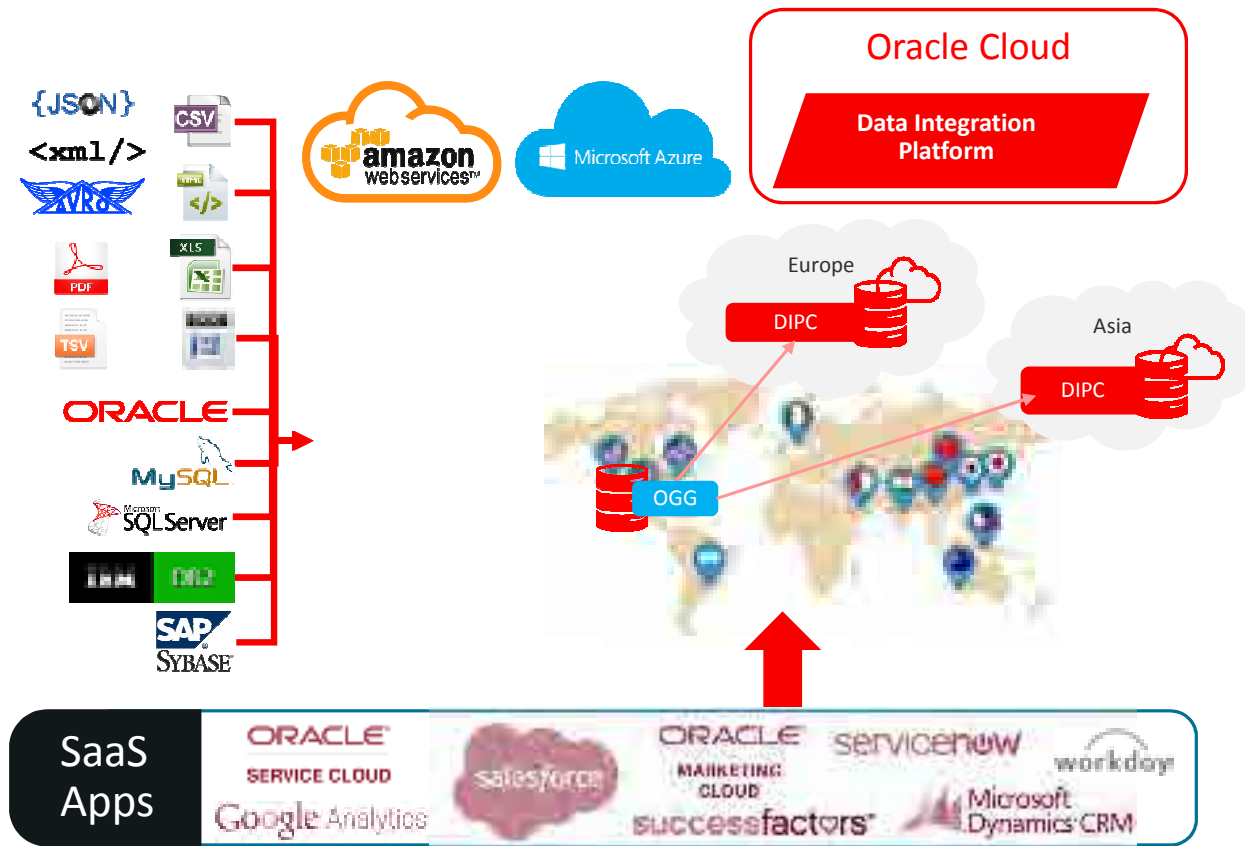

Real-Time Data Migrations

- Seamless data migration from older databases or poorly optimized Cloud services
- No data loss for phased / online migrations with reliable and proven core GoldenGate technology
- Migrate older Amazon RDS instances to Oracle or data delivery from on-premises to 3rd party Clouds
- Maximize Cloud infrastructure usage for complex transformations

Real-Time Operational Reporting

Provides **non-intrusive** data capture from on-premises databases

Provides **automated and real-time** data feed into the reporting environment in the cloud

Allows maintaining high level service agreement for query applications

ORACLE
