- Return everything please!

# Register REST Path Prefix

The screenshot displays the Oracle APEX interface. At the top, there are navigation tabs for 'Team Development' and 'Packaged Apps'. Below these, a search bar and user profile icons are visible. The main content area is divided into several sections. On the left, there is a 'Team Development' section with a yellow icon showing a circular flow of nodes. Below this icon, the text 'Team Development' is visible. In the center, a navigation menu is open, listing several options: 'Administration', 'Manage Service', 'Manage Users and Groups', 'Monitor Activity', 'Dashboards', and 'Change My Password'. The 'Manage Service' option is highlighted in blue. Below the navigation menu, there is a 'News and Messages' section with a yellow speech bubble icon and a message that reads: 'In 2016, come join the awesome APEX community at a user conference! Find one [here.](#)'. On the right side, there is a 'Dashboard' section with two circular gauges showing the numbers '92' and '42'.

Note: In the screen it may be upper case (ANTON) but the url must be lower case (anton).

# Build Something

- You have to REALLY read and follow the lesson
- Instructions: <http://concept2completion.com/iot>
- APEX Builder: <https://apex.oracle.com>
- register workspace with instructor
- Pause at the Bonus lesson
