Management

## What is General Data Protection Regulation (GDPR)?

GDPR is a new and important European Union (EU) privacy and security law

Designed to protect the rights and the freedoms of natural persons Applies to a very large set of public and private organizations around the world

Has significant management visibility because of very high fines and other obligations

We see a lot of security and compliance projects and we are involved in most of them

The General

## **DATA PROTECTION**

Regulation (GDPR) aim is to protect the privacy and data of individuals. Data protection requires good IT and good security

#### PROTECT THE DATA

Protect the data wherever it is and avoid using real data where non-necessary

#### **ACCESS CONTROL**

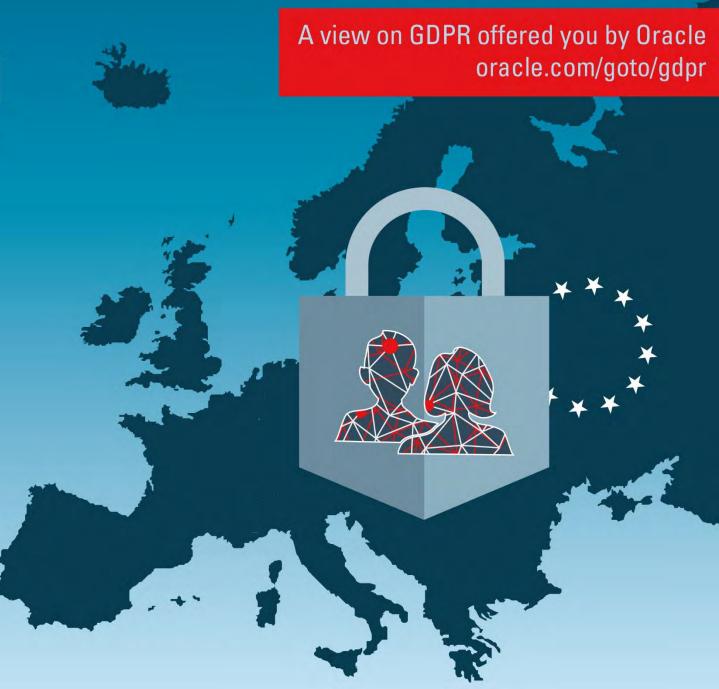

Guarantee authentication and authorization both for business user and IT personnel

#### **SECURE CONFIGURATION**

Secure configurations, remediate vulnerabilities, and control production baselines

#### **MONITOR, BLOCK & AUDIT**

Collect, secure and analyze audit logs and implement boundary defenses

"Security is the single most important issue that we face, from cloud to our on-premise data centers. Security is job one at Oracle since day one at Oracle."

@LarryEllison
Oracle Executive Chairman and CTO

ORACLE!

#00W16

### Why Oracle for GDPR?

Enforcement Discovery Enrichment Foundation

We can help to achieve compliance to GDPR.

We can help to:

- Discover sensitive data with data governance solutions
- **2. Enforce** data, software and identity security
- **3. Enrich** application functions to guarantee rights of data subjects
- 4. Support a foundation that includes good IT practices, and high availability and resilience

Capgemini was one of the first companies to be named a global Diamond level partner by Oracle. Achieving this status – the highest in the Oracle PartnerNetwork (OPN) Specialized program – confirms our expertise in implementing Oracle products and in helping customers worldwide use them to accelerate their growth and success.

- 200,000 Staff
- 4 145 Countries
- Leading Global System Integrator

- 420,000 Customers
- 4 145 Countries
- Major Market Share

working in partnership to help our customers drive GDPR compliance and greater **TRUST** in their brand

#### **During 2017 - 2022 Company X has truly Digitally Transformed**

- > Fortune 500
- > 100K+ employees
- > 60 countries

What **COMPONENTS** were the focus?

Business Outcomes

Organisational Change

Technology change

Culture & ways of working

#### **TRANSFORMED**

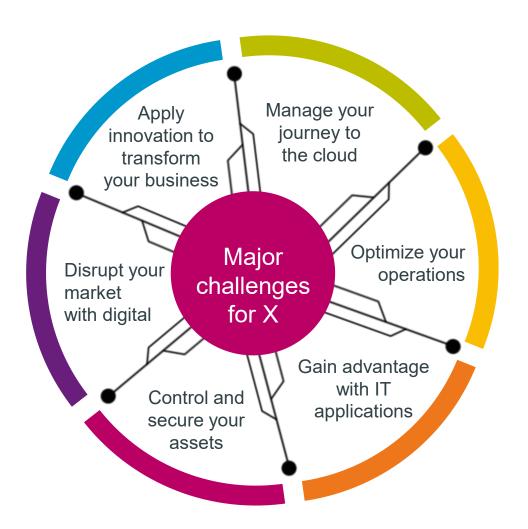

Ecosystem

#### This is what organization X looks like in 2022

**Cloud**. Organization X is a cloud first enterprise. This enables the organization to beat the competition through efficiency, agility, scalability, innovation. Organization X has allocated workloads to public, private or hybrid cloud infrastructure in a safe manner.

**Insight & data**. Organization X collects vast amounts of data and uses advanced technology to analyze data and make decisions. Insights are delivered in real time and enable organization X to be nimble and seize opportunities.

**Digital employee experience**. Employees of organization X have a digital experience in every part and level of the organisation. Digital is pervasive.

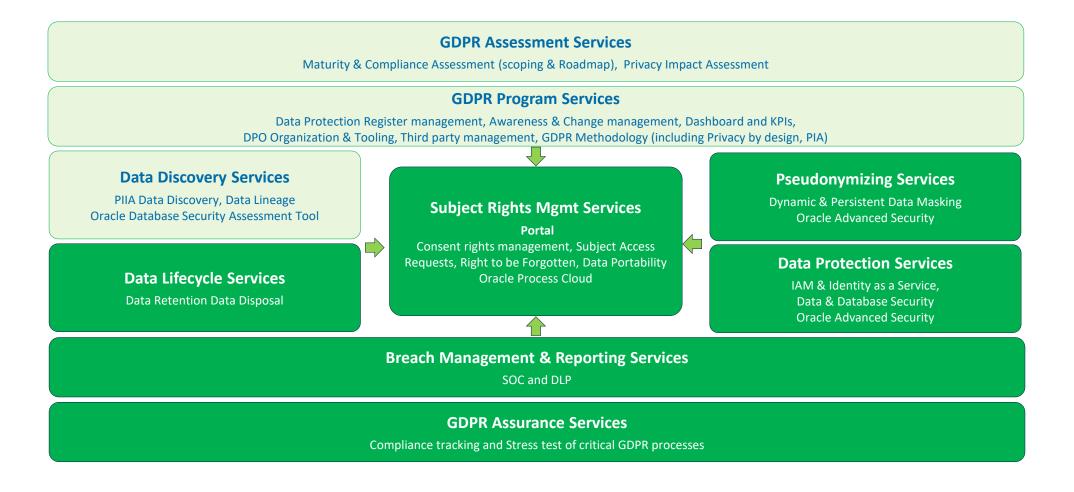

**Digital customer experience**. Customers of organization X have a full digital Customer Experience. Customers can access digital services or organization X. Customers live an enhanced customer experience

**Cyber security**. Organization X stays ahead of increasingly sophisticated threats through consulting & assessment, protection, monitoring and threat hunting.

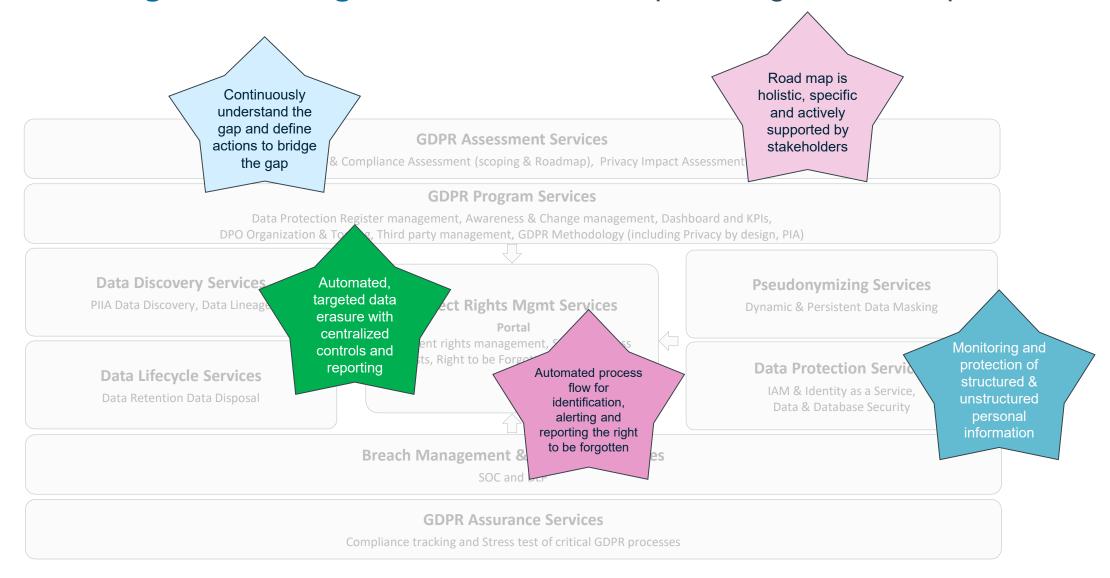

#### By May 2018 a 'Digital Enabling', GDPR compliant regime was implemented

Aligned to the business and digital strategies of the organisation

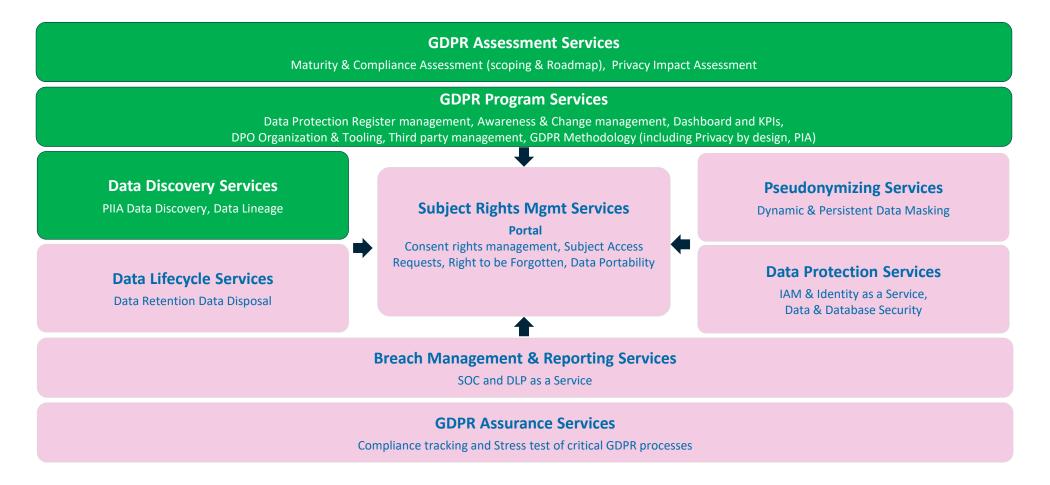

By May 2018 a 'Digital Enabling' oriented GDPR compliant regime was implemented

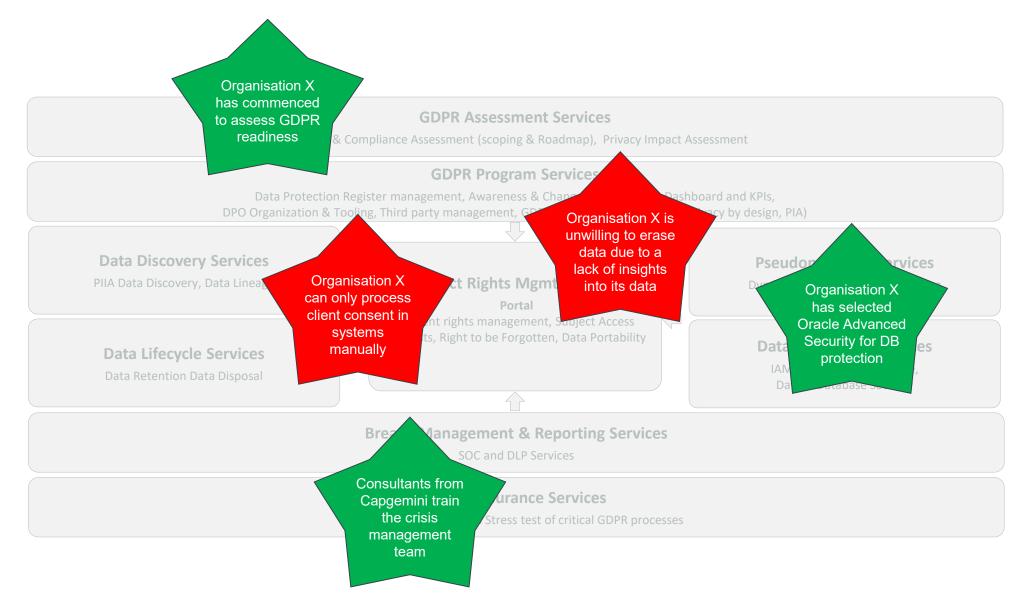

#### In 2017 Strategy Development and Execution Commenced

Aligned to the business and digital strategies of the organisation

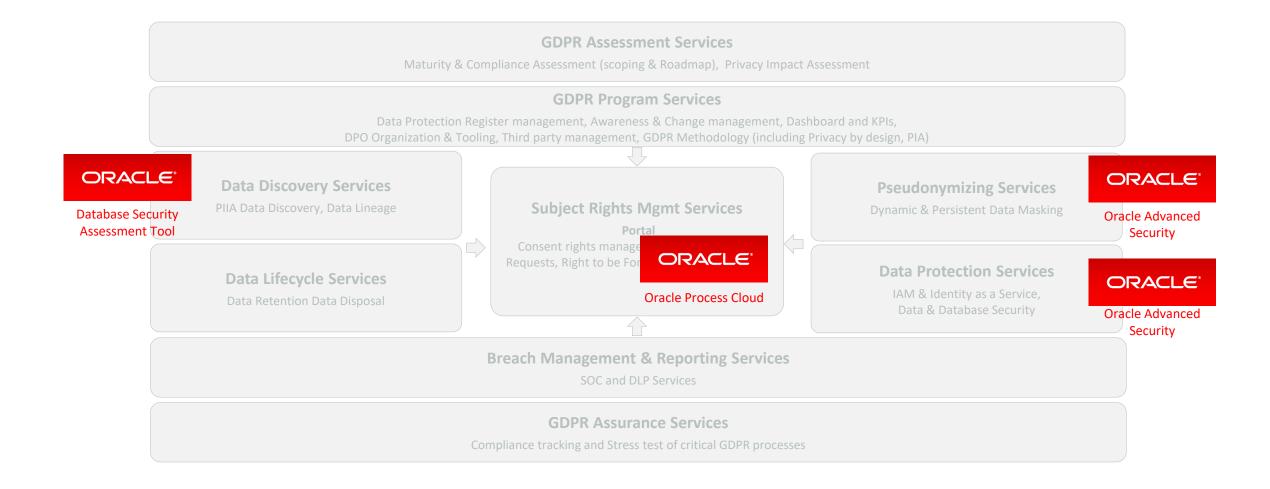

#### In 2017 Strategy Development and Execution Commenced

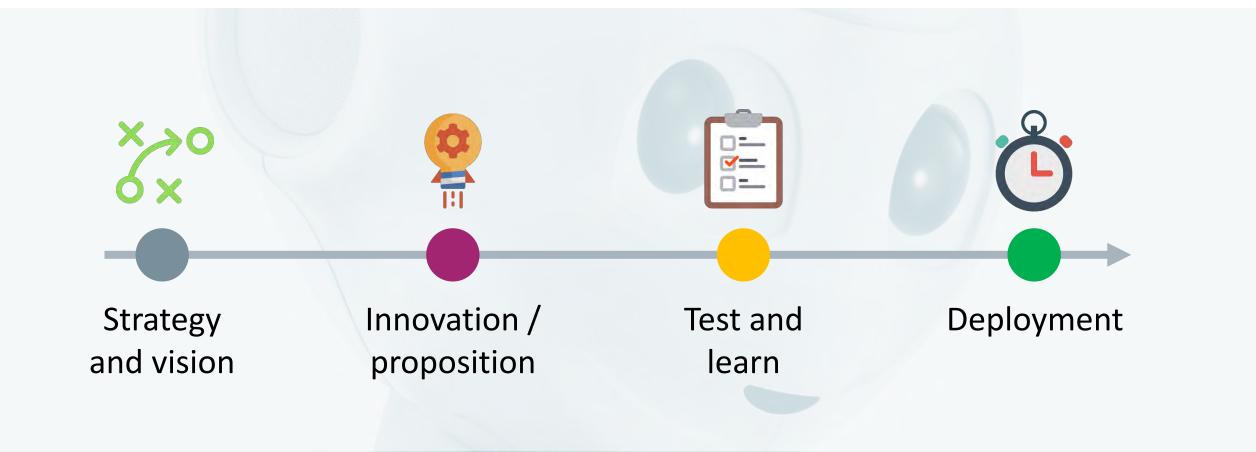

#### In 2017 Strategy Development and Execution Commenced

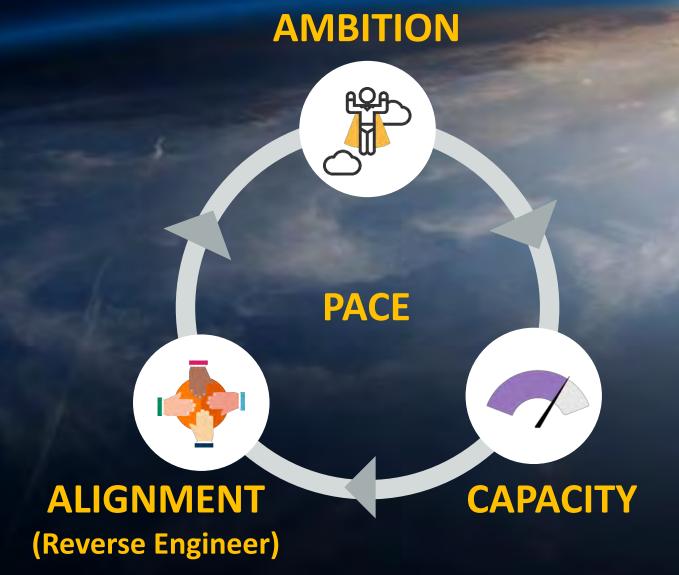

## **Journey to Change**

## Conclusion

A GDPR Compliance Strategy solely focused on the enterprise of May 2018...

Will not deliver the levels of data protection, privacy and trust needed in 2022

Russ Lowenthal; Director, Database Security Product Management

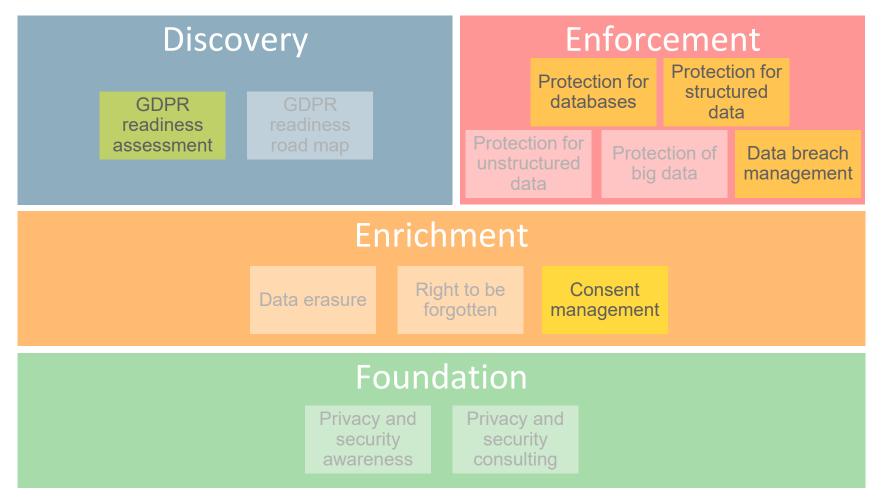

## GDPR Articles and Mapping to Oracle Database Security

GDPR Article	Protection Mechanism
Article 35	Data Protection Impact Assessment
Article 32	Pseudonymization and encryption of personal data
Article 25, 29	Data protection by design and by default Processing under the authority
Article 30, 33	Notification of a personal data breach
Article 18, 25, 32	Right to restriction of processing  Data protection by design and by default
Articles 25, 32	Pseudonymisation and encryption of personal data Data Minimization
Article 25	Data Protection by Design and Default

## **EU GDPR and Database Security**

Securing data in your Oracle Databases is a fundamental component of GDPR compliance.

Database Security is also one of the more simple GDPR tasks – an easy way to demonstrate progress in your compliance project!

### A view on Database Compliance

#### Oracle is the leader in DBMS

- Discovery
  - Configuration Analysis
  - Sensitive Data Discovery

- Enforcement
  - Encryption and Key
     Management (Advanced
     Security, Key Vault)
  - Access Controls (Database Vault, Real Application Security)
  - Anonymization (Data Masking & Subsetting, Data Security Cloud Services)
  - Activity Monitoring (Audit Vault & Database Firewall, Data Security Cloud Services)

- Enrichment
  - Enforcement of consent and restriction of processing (Label Security)

## GDPR Articles and Mapping to Oracle Database Security

GDPR Article	Protection Mechanism	Oracle Mapping
Article 35	Data Protection Impact Assessment	Configuration & Compliance Cloud Service Database Security Assessment Tool  NEW
Article 32	Pseudonymization and encryption of personal data	Advanced Security, Key Vault
Article 25, 29	Data protection by design and by default Processing under the authority	Database Vault
Article 30, 33	Notification of a personal data breach	Audit Vault and Database Firewall Security Monitoring and Analytics Cloud Service
Article 18, 25, 32	Right to restriction of processing  Data protection by design and by default	Label Security
Articles 25, 32	Pseudonymisation and encryption of personal data Data Minimization	Data Masking and Subsetting
Article 25	Data Protection by Design and Default	All of the above
