Oracle Cloud Platform for Integration

Application and Data Integration

Complete

Simplified

Open

A large black pipe extends from the left side of the frame, pouring a thick, red, muddy stream into a body of water. The water is a pale blue, and the surrounding area is a marshy field with tall, dry grasses. The scene is set against a clear blue sky.

Data Lake... or Data Swamp?

Key Success Factors for your Data Lake

Timely access to data

Flexibility to extract and work the data as needed

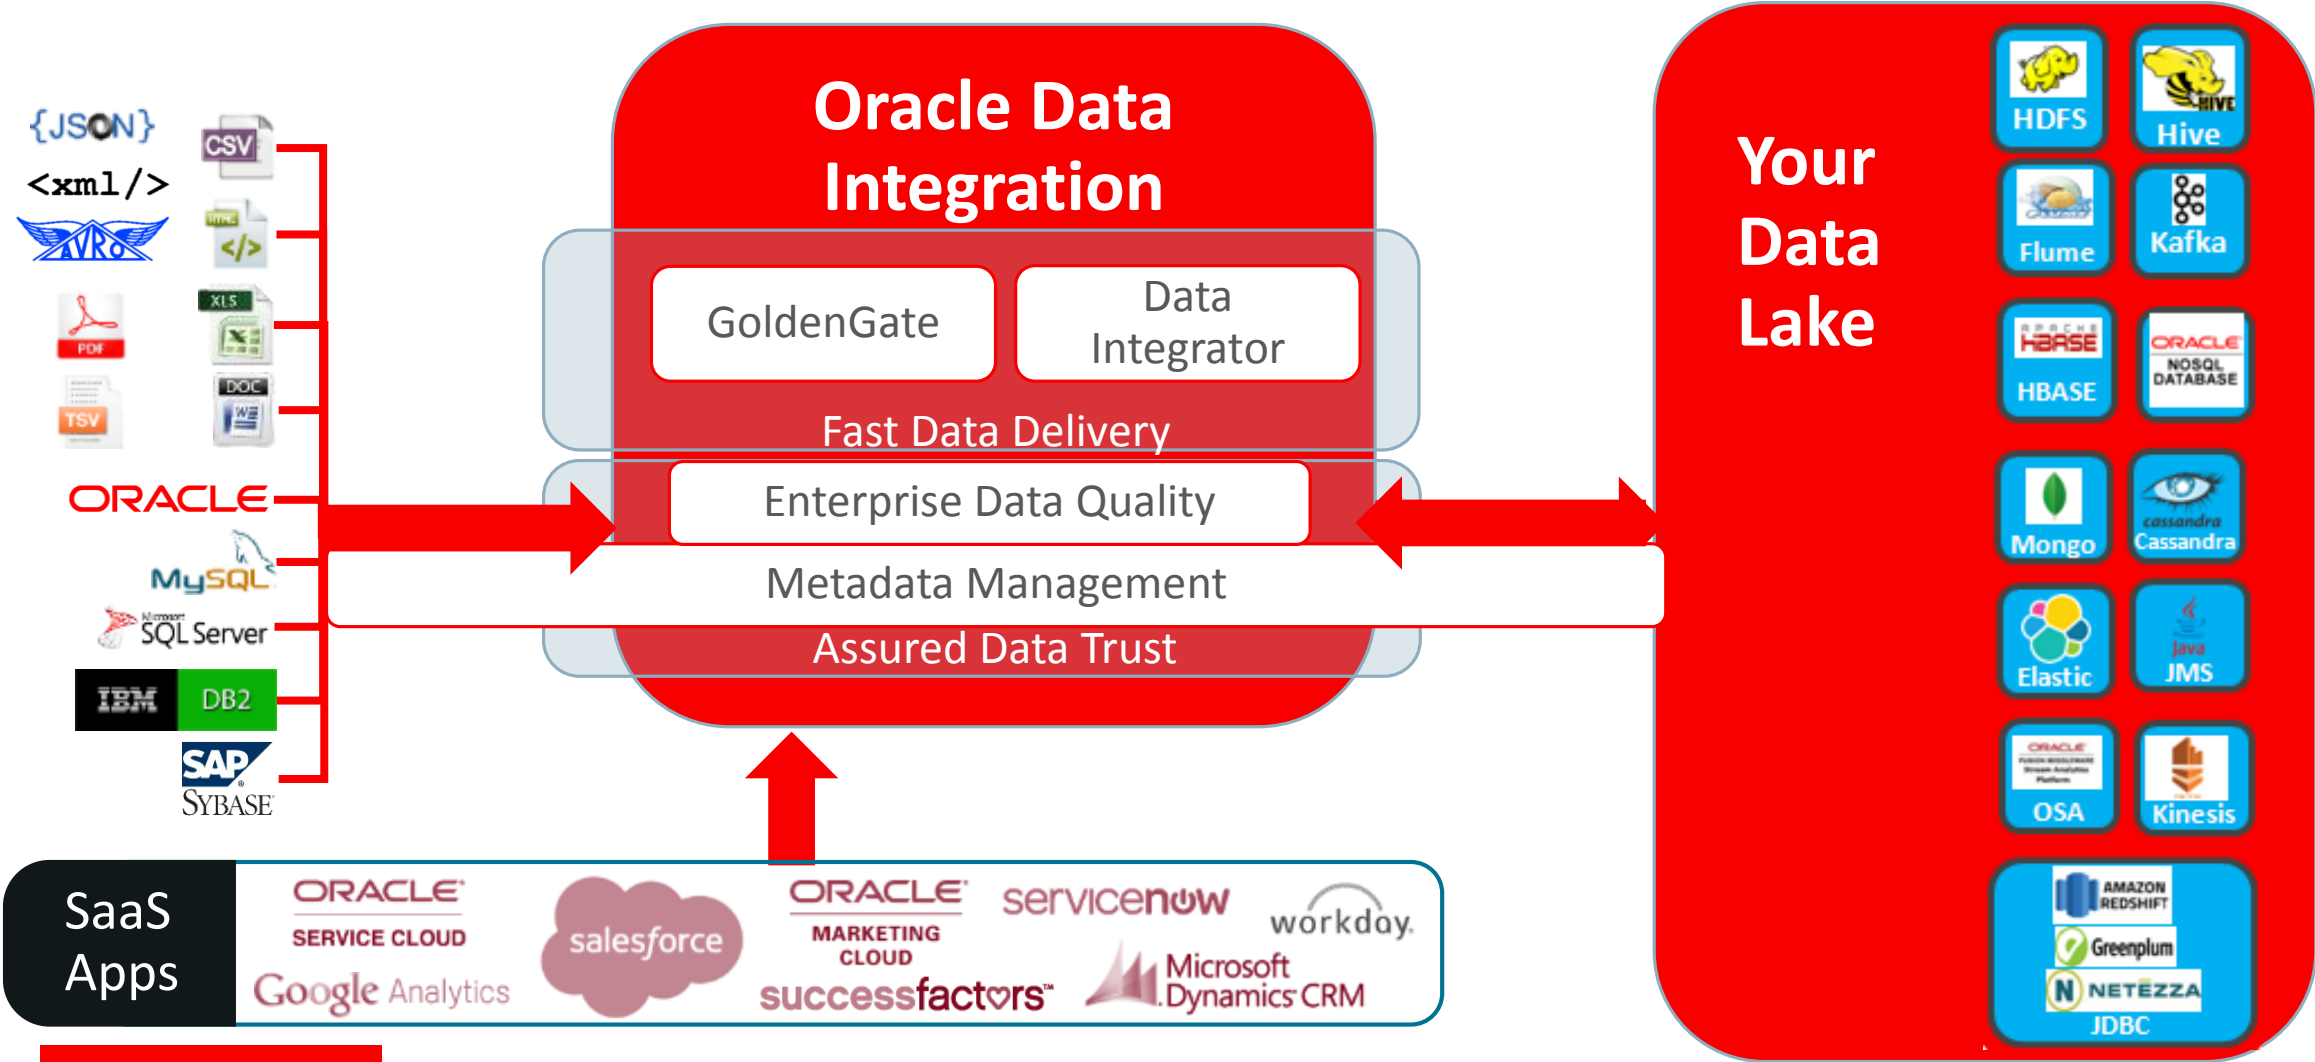

Trust in the quality of the data

Ability to **find** and **understand** the available data

Source: **Knowledgent** - <https://knowledgent.com/whitepaper/design-successful-data-lake/>

Reference Architecture with Oracle Data Integration

Key Success Factors for your Data Lake

Timely access to data

Flexibility to extract and work the data as needed

Trust in the quality of the data

Ability to **find** and **understand** the available data

Source: **Knowledgent** - <https://knowledgent.com/whitepaper/design-successful-data-lake/>

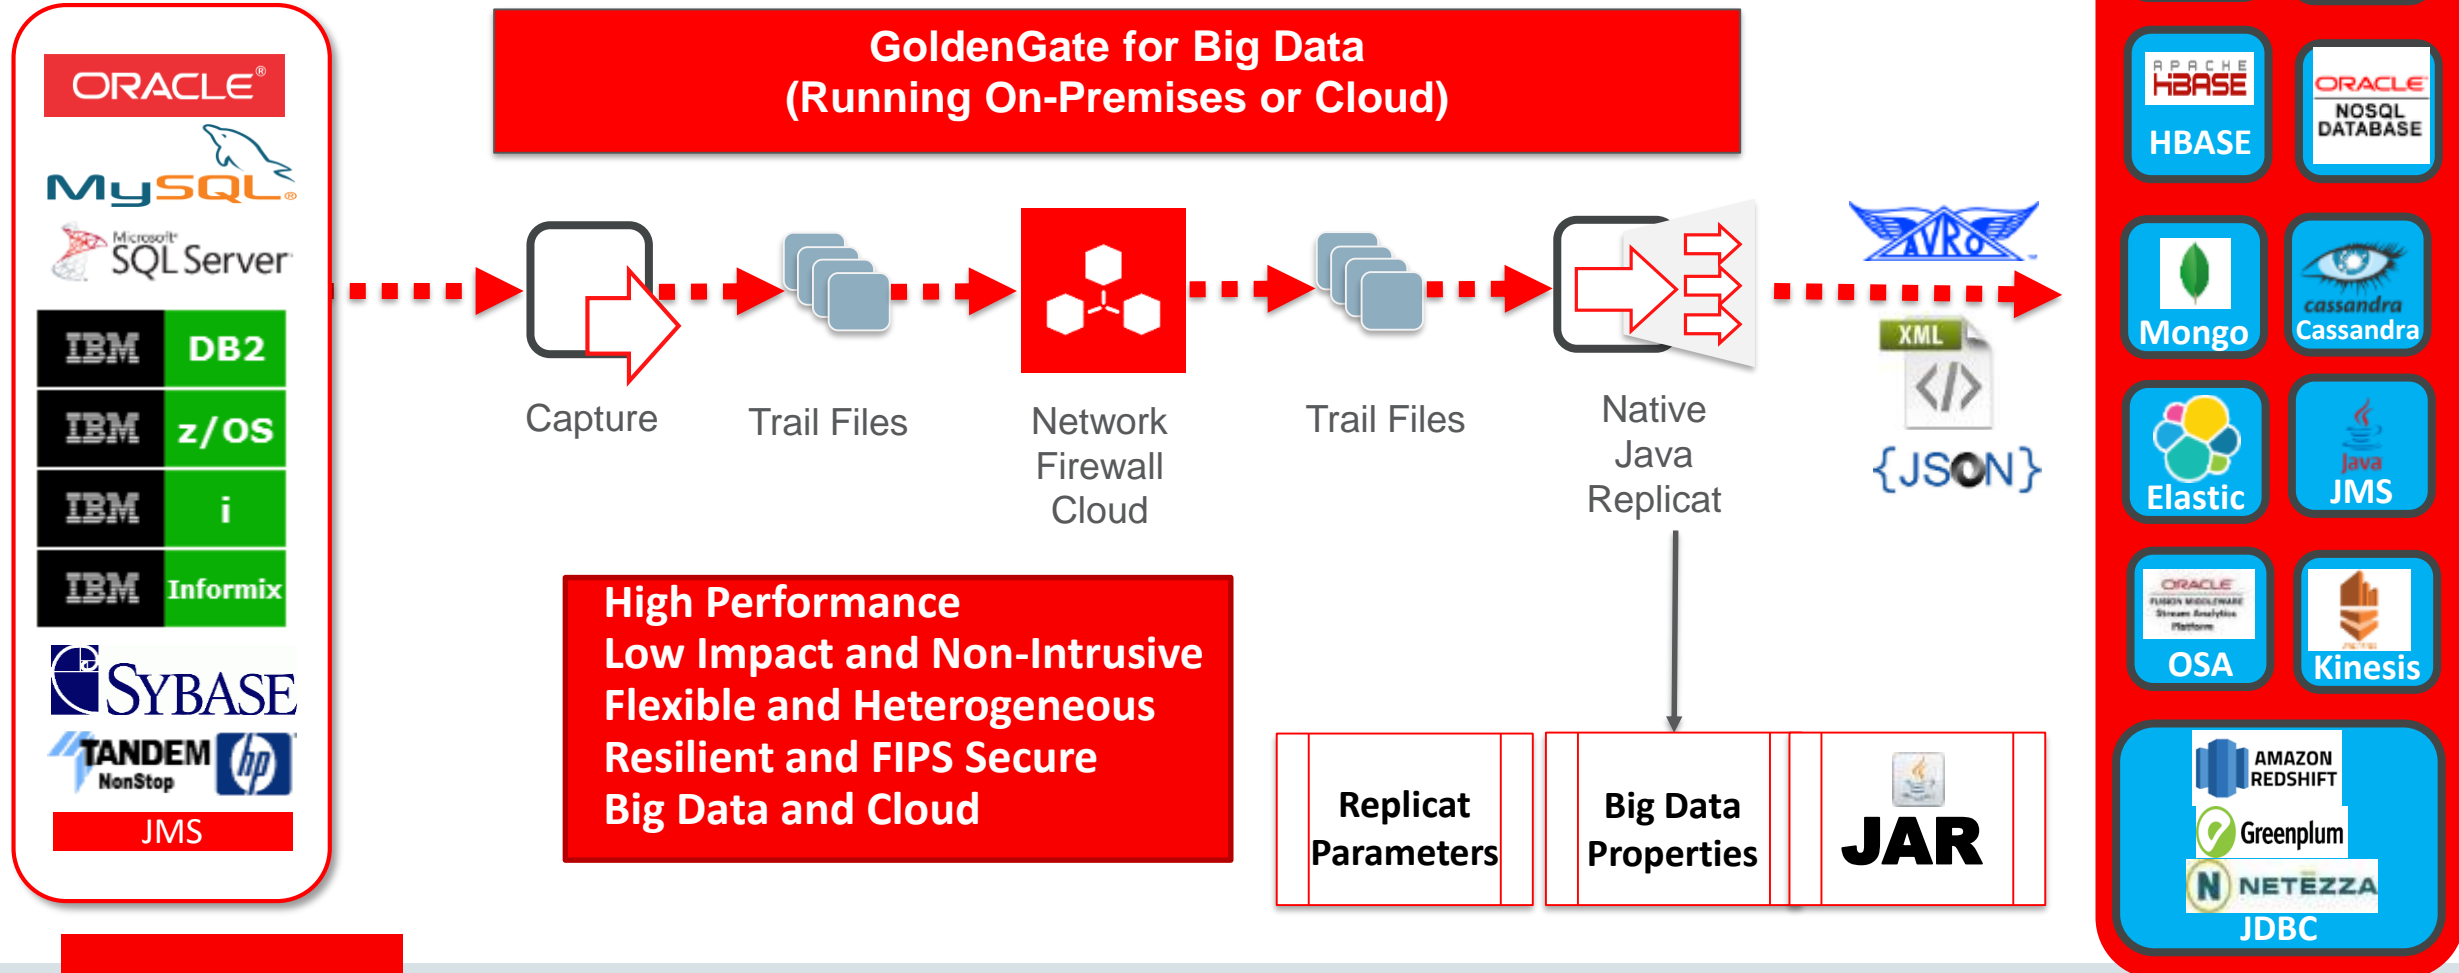

Why GoldenGate?

- The Sushi Principle – ‘Data is best served raw’
- Some of the biggest data lakes use Oracle GoldenGate’s change data capture capability for real-time ingestion from source databases
- Traditional normalization, aggregation and schematization are skipped to simplify data flows and improve timeliness and performance

Oracle GoldenGate for Big Data

Modular & Pluggable Architecture

Key Success Factors for your Data Lake

Timely access to data

Flexibility to extract and work the data as needed

Trust in the quality of the data

Ability to **find** and **understand** the available data

Source: **Knowledgent** - <https://knowledgent.com/whitepaper/design-successful-data-lake/>

Continued Focus on Our Vision:

Integrate Any Data Shape, Speed, Action, Volume & Location

Any Data Shape

Polyglot

Any Data Speed

Lambda

Any Data Action

Dataflow | Pipes

Any Data Volume

Open Source Platforms

Any Data Location

Cloud Infrastructure

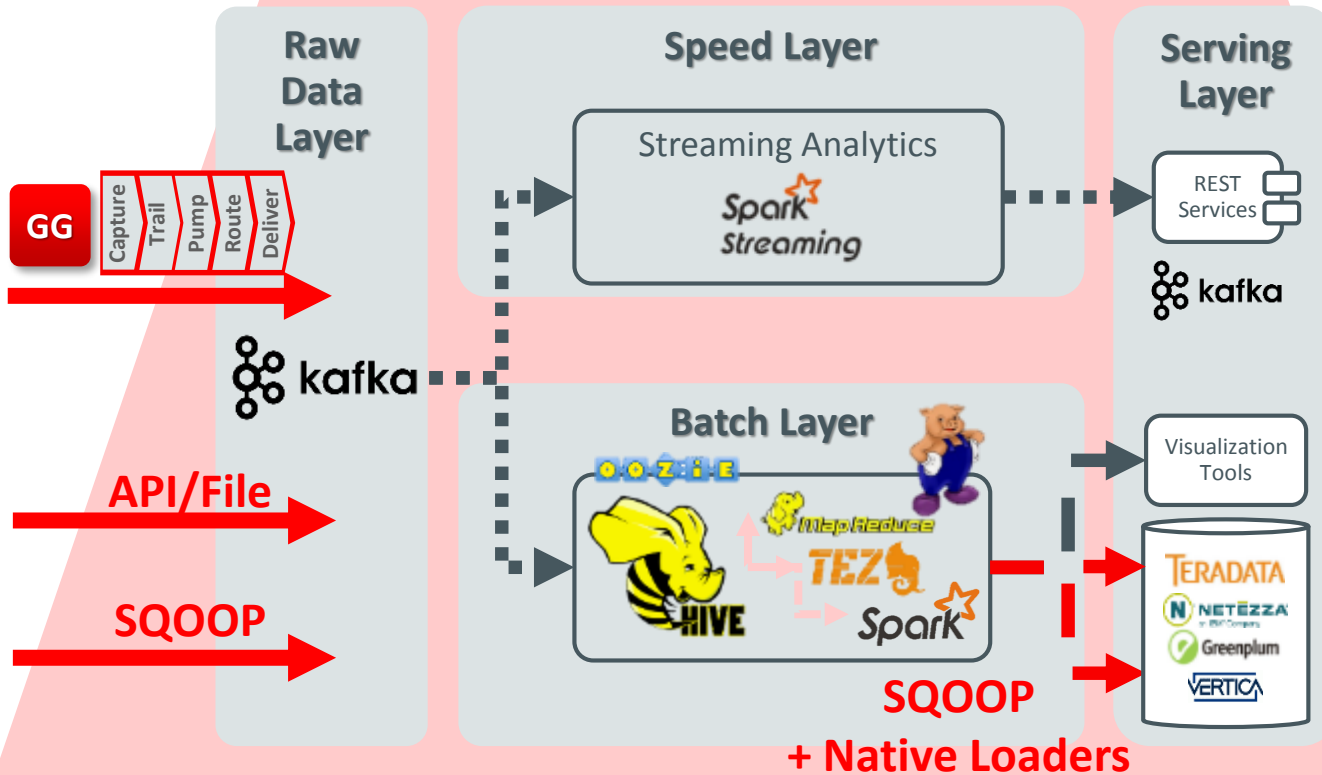

Why Oracle Data Integrator?

- To provide true analytical flexibility and accuracy, some data re-shaping may be needed, especially as Data Lakes are increasingly working with **Master Data** as well as **Transactional Data**
- ODI's EL-T architecture can be very important when working with large volumes
- This may be done reading from a Data Lake and writing to a Data Warehouse
- ODI can also pushdown data transformations into the Data Lake

Big Data Transformation with Data Integrator

Oracle Data Integrator

Data Integrator for Big Data

- ✓ Batch data ingestion with Sqoop, native loaders & Oozie
- ✓ Generate data transformations in Hive, Pig, Spark & Spark Streaming
- ✓ Extract data into external DBs, Files or Cloud

Benefits

- ✓ **No ETL Engine** native E-LT execution, 1000s of references
- ✓ **Zero Footprint** does not require any Oracle install on cluster
- ✓ **Loosely Coupled** design time means you can reuse mapping logic in many big data languages

Key Success Factors for your Data Lake

Timely access to data

Flexibility to extract and work the data as needed

Trust in the quality of the data

Ability to **find** and **understand** the available data

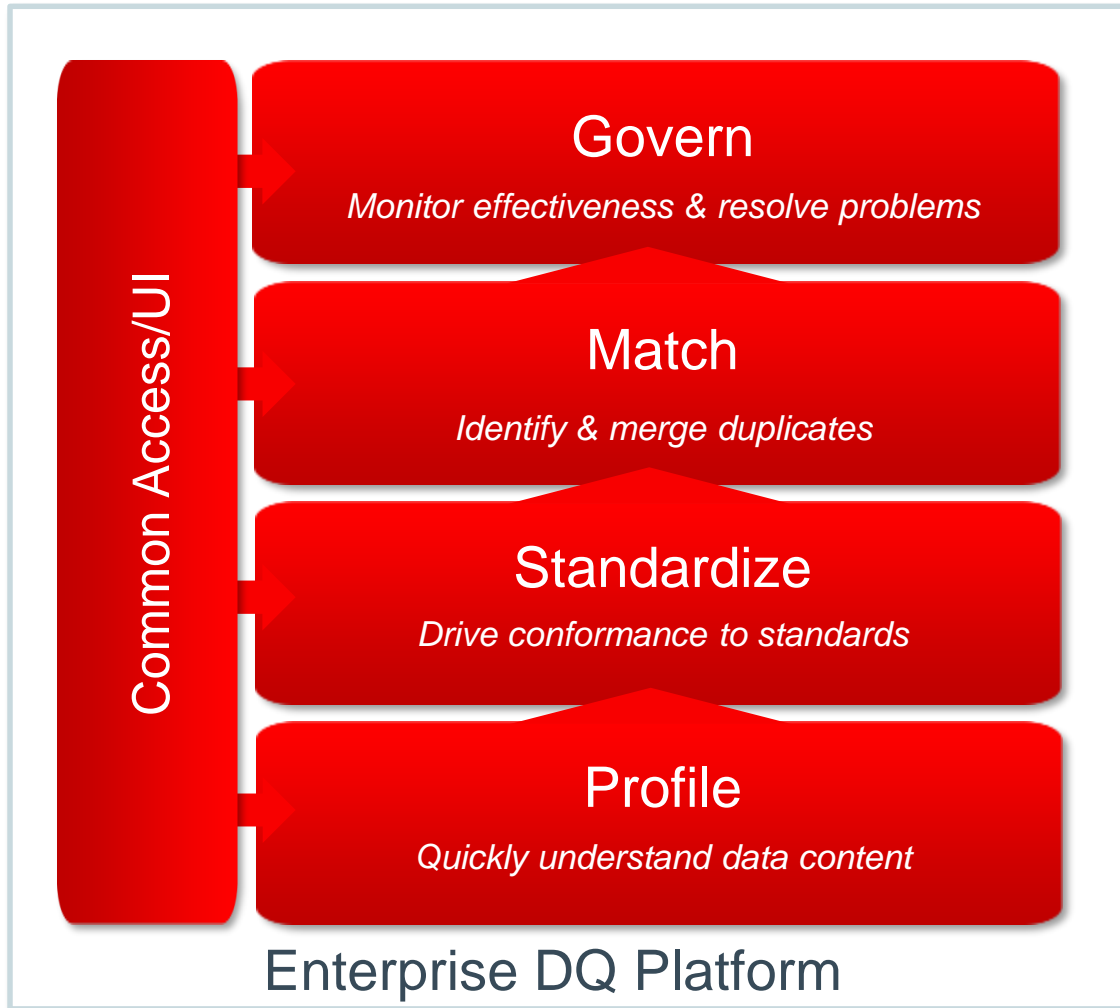

Source: **Knowledgent** - <https://knowledgent.com/whitepaper/design-successful-data-lake/>

Some data can only be trusted if it is prepared

- Data Consumers need access to **Master Data** as well as **Transactional Data**
- Relating the two can be very powerful...
- ... but this is where raw data can be poisonous to strong business analytics
 - **Incomplete records**
 - **Hard-to-find Duplicates**
 - **Out-of-date information**
 - **Inconsistencies in data capture**

Why Oracle Enterprise Data Quality?

Market-leading usability for all types of data

Unparalleled time-to-value

High performance engine

Out-of-the-box global knowledge-base

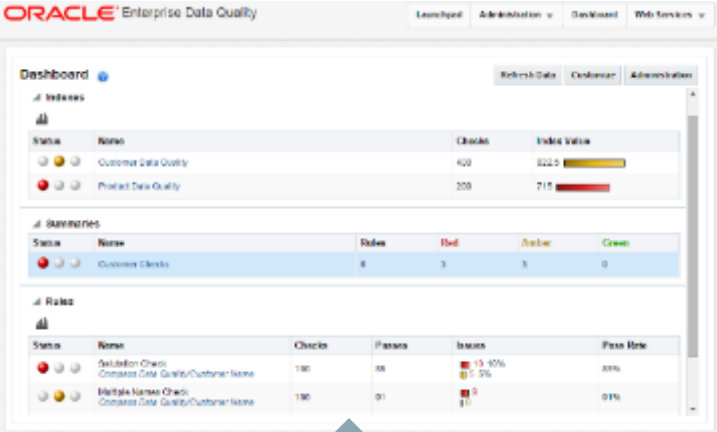

Foundation for governance program

EDQ · Collaborative Data Quality Governance

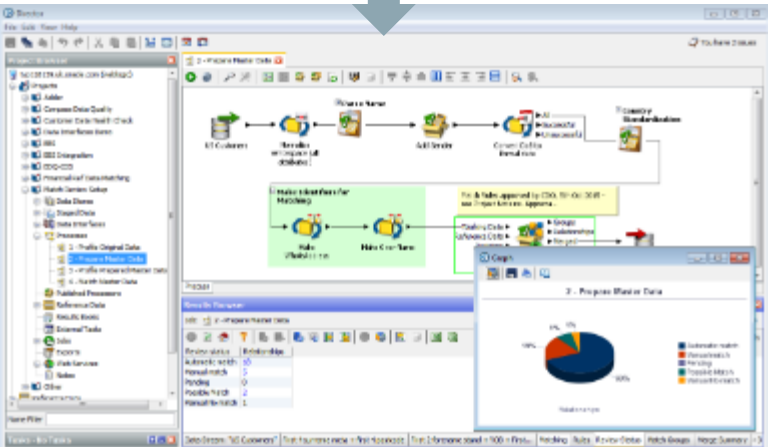

Data Analysts

- Immediate Data Insight
- Reusable DQ Services and Rules
- Transparent, self-documenting configuration

Data Stewards

- Flexible Data Review and Remediation options in EDQ Case Management
- Integrated with DQ Rules
- Fully audited with comments, attachments, history, reports

Data Stakeholders

- Zero Training EDQ Dashboard
- View by Data Asset, Data Domain, Rule
- Trend Analysis

Key Success Factors for your Data Lake

Timely access to data

Flexibility to extract and work the data as needed

Trust in the quality of the data

Ability to **find** and **understand** the available data

Source: **Knowledgent** - <https://knowledgent.com/whitepaper/design-successful-data-lake/>

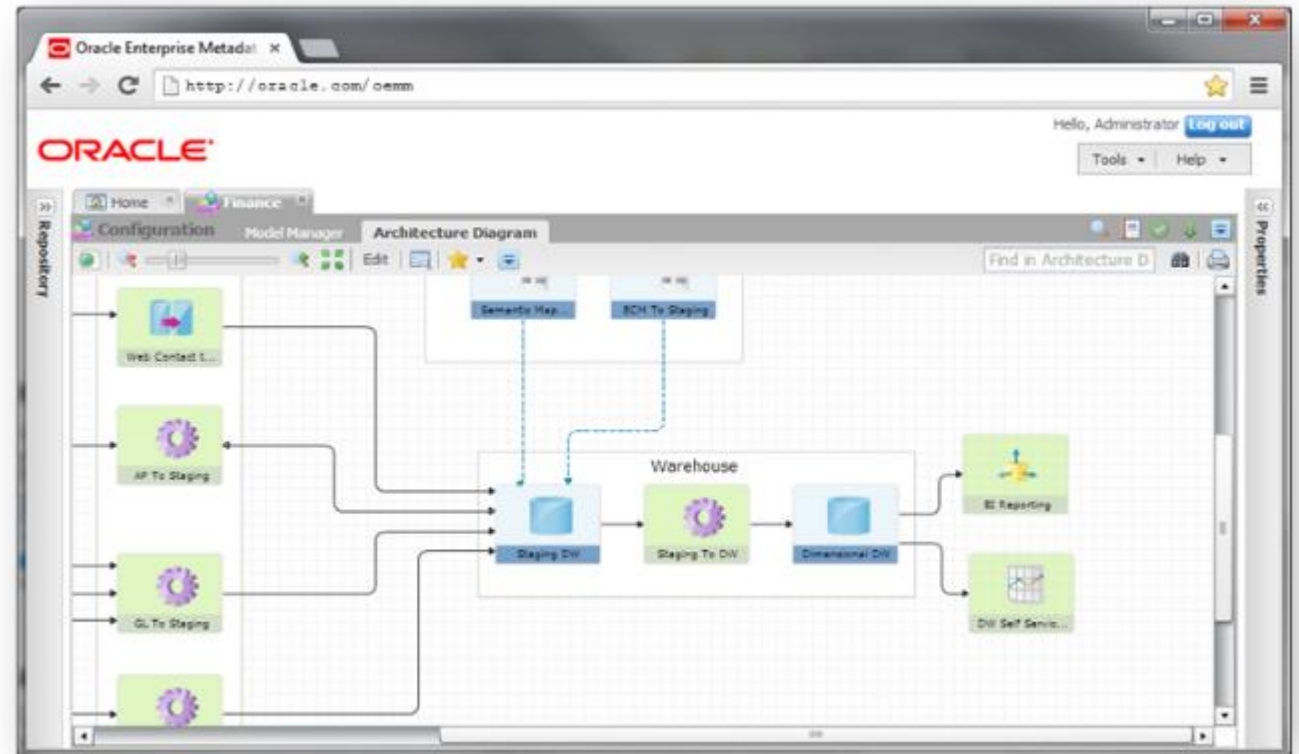

Why Metadata Management for the Data Lake?

Without Metadata Management

- x Silos of Data known only to their owners
- x No documentation
- x Duplicate effort and inefficient usage
- x No data usage analysis

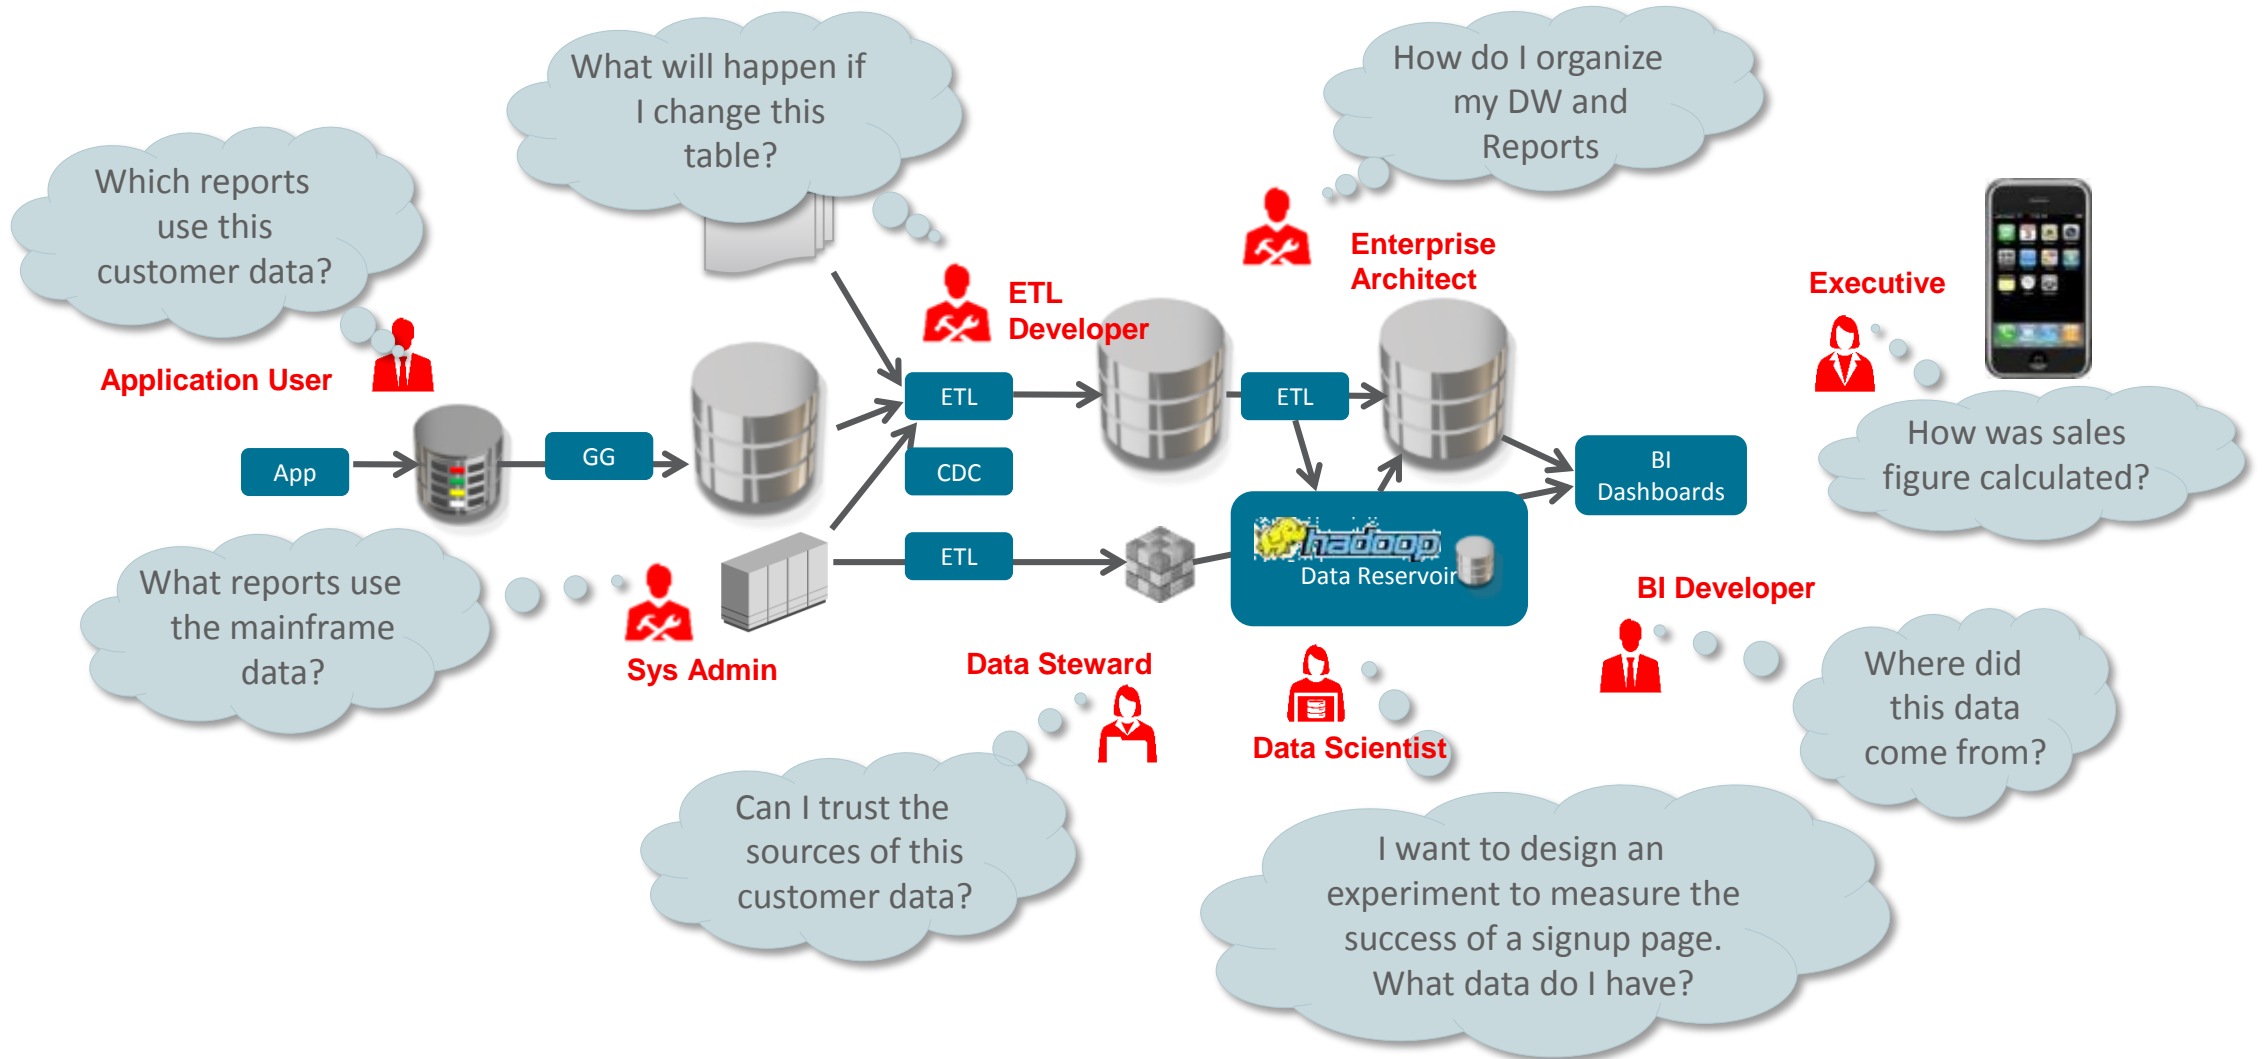

With Metadata Management:

- ✓ Searchable
- ✓ Enriched with documentation
- ✓ Shared knowledge
- ✓ Lineage/impact analysis
- ✓ Semantic analysis

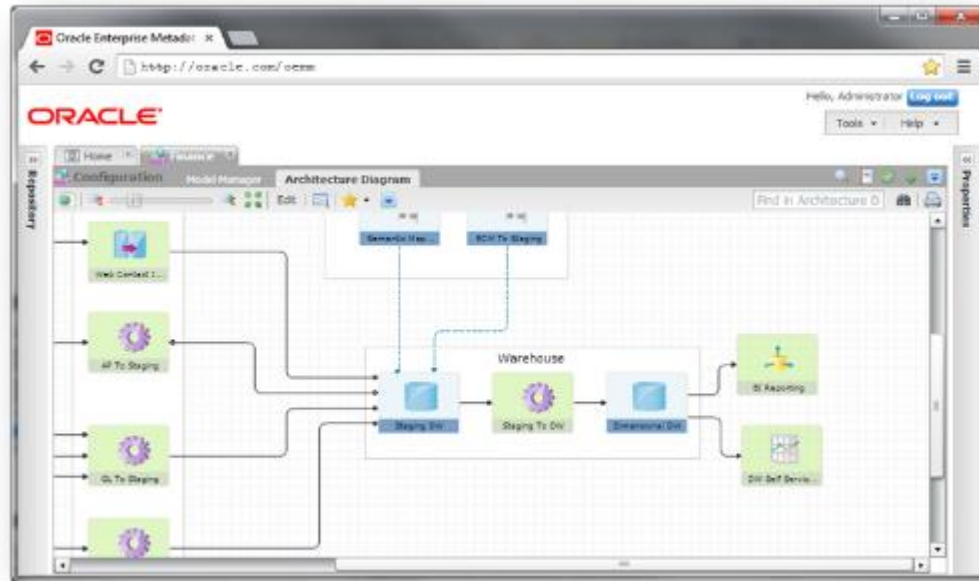

Value of Enterprise Metadata Management

Solves significant pain points for wide variety of business consumers and technical staff

Find and Understand your Data

- **Metadata Management** – horizontal and semantic data lineage for all data sources
- **Business Glossary** – simple tools to catalog, link and collaborate on business terms

- ✓ Business Data Catalog
- ✓ Report to Source Lineage
- ✓ Impact Analysis
- ✓ Audit, Versioning & Diff Reports
- ✓ Social/Collaboration Features
- ✓ Annotations and Tagging
- ✓ Comprehensive Harvesting
 - ✓ 3rd Party BI Metadata
 - ✓ 3rd Party ETL Metadata
 - ✓ 3rd Party DB Metadata
 - ✓ 3rd Party Modeling Tools
 - ✓ Big Data Metadata
 - ✓ Metadata Standards

What does **Potable Data** mean?

- **Quickly and Easily Consumable** and **Trusted**
 - You can use GoldenGate to make data more quickly available, streamed into (and through) the Lake using CDC
 - You can use ODI to make the data easier to consume
 - Trust is not only about 'how good it is', but **knowing** how good it is (or not), and **where it came from**
 - You can use EDQ to add Data Quality dimensions to your data as it is streamed into the Lake...and the analytics tools you already use to tell you how good the data is
 - You can use OEMM to **understand** the data, and **where it comes from**

Get a sneak peek at cutting-edge data integration designs and receive a free gift!

- Oracle is constantly developing new software and features that will make your work easier, and Oracle's User Experience team would love to get your feedback on new data integration designs.
- Feedback sessions will take place at a date and time of your own choice.
- You can take part via webconference, from the comfort and convenience of your own office.
- If you're interested, please fill out the 1-page form at <http://bit.ly/2vIH1Sg>
uppercase I lowercase l
- To show our appreciation, we will post all participants their choice from a wide selection of thank-you gifts.

Data Integration Programme – FOCUS ON DOC LINK

Sunday, October 1

- Lift and Shift Workloads to Cloud with Oracle Data Integration Platform Cloud [SUN6653]
- Data Movement between On-Prem, Fusion ERP Cloud, Fusion HCM Cloud and Salesforce [SUN7286]
- Accelerate Migration to Cloud Infrastructure with Data Integration Platform [SUN6896]

Monday, October 2

- Oracle Data Integration Platform Strategy and Roadmap [CON6646]
- **Filling Your Data Lake with Potable Data, Using Data Integration [CON5465]**
- GoldenGate : Deep Dive into Automating OGG using the new Microservices [CON6569]
- Oracle Data Integration Platform: Foundation for Cloud Integration [CON6650]
- Oracle Data Integration Platform Empowers Enterprise Grade Big Data Solutions [CON6893]
- Oracle Data Integration Platform Cloud Deep Dive [CON6651]
- Oracle GoldenGate Cloud Service: Real-Time Data Replication in the Cloud [HOL7715]

Tuesday, October 3

- Oracle Data Integrator Product Update and Strategy [CON6654]
- Oracle Enterprise Data Quality: Product Overview and Roadmap [CON6656]
- Accelerate Cloud On-Boarding Using Oracle GoldenGate Cloud Service [CON6894]
- Oracle Enterprise Data Quality for All Types of Data [HOL7653]
- Oracle Data Integration Platform: a Cornerstone for Big Data [CON6655]
- GoldenGate: MAA and Best Practices for Oracle GoldenGate Microservices [CON6570]
- Oracle GoldenGate Product Update and Strategy [CON6897]

Wednesday, October 4

- A Practical Path to Enterprise Data Governance with Oracle Enterprise Data Quality [CON6657]
- Oracle Data Integrator and Oracle GoldenGate for Big Data [HOL7708]
- Introduction to Oracle Data Integration Platform Cloud [HOL7673]
- An Enterprise Databus: GoldenGate in the Cloud Working with Kafka and Spark (CON6895)
- GoldenGate: Best Practices & Deep Dive on OGG 12.3 Microservices at Cloud [CON6568]
- Oracle GoldenGate for Big Data [CON6898]
- Oracle Data Integration Platform Cloud Service Governance Edition [CON6652]
